

## AI Policy

At Tanque Verde Pediatrics, we strive to provide the best care for your child while maintaining accuracy and efficiency in our documentation. To assist in the documentation of office visits, we are utilizing a HIPAA-compliant virtual scribe service called Freed AI.

### How It Works:

- Freed AI will assist in documenting the details of your child's office visit, including information discussed during the consultation, diagnoses, treatment plans, and any other relevant medical data.
- The physician will continue to review, edit, and finalize all notes before they are added to your child's medical chart.
- The virtual scribe service, Freed AI, complies with all applicable HIPAA regulations to ensure the privacy and security of your child's health information.

You will receive a consent form upon checking in for your appointment. If you would like for your doctor to not use a virtual scribe, you may decline on the consent form. Please also inform your doctor of your preferences during the visit.

Thank you for trusting us with your child's care.

Sincerely,

The Doctors at Tanque Verde Pediatrics
